Natural Compatibles Wet and Dry

MAY 9, 2011

Be the first of your friends to like this.

First impressions: Great little black compact, sleek design with the standard mirror and sponge underneath.

Application: Oh my gosh! I can't relay how excited I am about this product! Absolutely FLAWLESS coverage. I have fair skin and was able to blend the medium tone perfectly. Applying it wet gives an immaculate, medium/heavy coverage and dry with a kabuki brush gave me perfect, natural skin tone with absolutely no imperfections.

Wear and tear: Goodbye concealer! This foundation does it all. From covering dark under-eye circles to red imperfections and evening out skin tone, I couldn't recommend this product highly enough!}

Would you buy it?: Without a doubt, I have already placed my order for my next one. I will never be looking for another foundation again. Nothing compares to this, and I've just about tried them all.

Scorecard: 10/10. This is one incredible foundation.

WELCOME TO DDGD

The daily edit of the best things to buy online. DDGdaily is the place to go for 'where did you buy that?' style finds, outfit inspiration, the most unmissable online sales and much, much more. Happy shopping xo
