2010  
Fabulous:

#### Why I love it:

- Available in five different shades from light to dark for all concealing needs
- Sponge tip applicator that is very easy to apply without ever having to worry about any spillage
- Creamy powdery texture that dries really quickly
- *Star ingredients:* Titanium dioxide, Beeswax, Carnauba Wax
- Each applicator can last for up to 100-150 applications
- I find the formula is better use to cover dark eye area rather than for acne as it is more of a powdery texture it only emphasis the acne
- I used #C2 (Beige) shade to conceal my dark eye circles pretty well and smooths the under eye area and there was no "creeping into fine lines" by 3pm.

RRP AUD\$30
